

## VBS instructions for truck drivers

The entry page for truck drivers is intended for entering the one-time permit number and the vehicle booking PIN. One-time permits are available to drivers at the external truck terminal. Drivers obtain the vehicle booking PIN from their freight forwarder or haulier. Data is entered on the entry page for drivers + accepting the general terms and conditions. The entry date is system-configured.

After entering their permit number and vehicle booking PIN, a window will open where the driver enters the registration plate number of the vehicle and trailer. Saving the entered data will confirm the booking. When the time of the booking slot starts, the vehicle may enter the port.
