VBS Mobile - Notifications

LUKA KOPER
Port of Koper
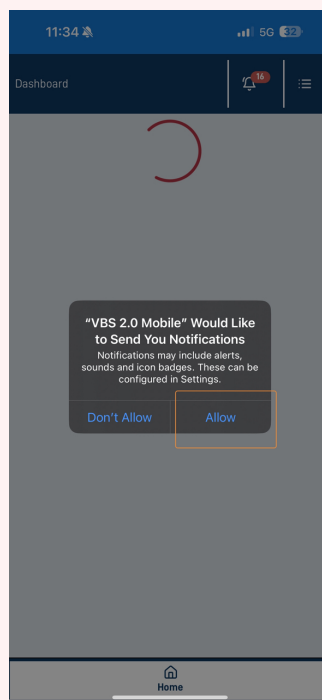

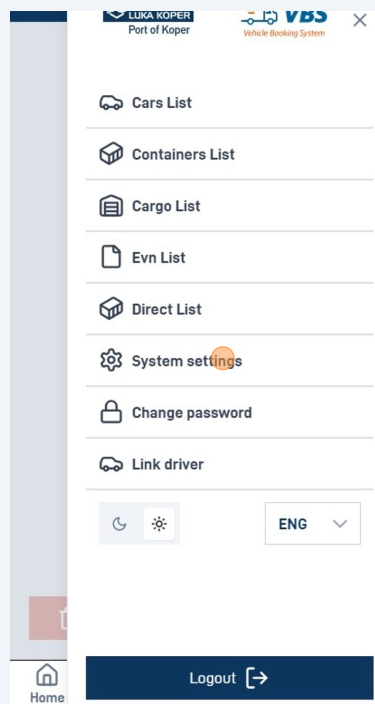

ⓘ The VBS mobile application allows users to receive various notifications. In the system settings tab, all available types of notifications are listed, and the user can choose which ones they would like to receive.

⚠ To enable notifications, the user must allow them after adding the shortcut to the home screen. Upon first login, a pop-up window will appear asking the user for permission to send notifications. The user must select **"Allow"**.

2 **Notifications in the VBS Mobile App:**

• **Badge expiration** - Driver pass expires in 2 weeks. Notification is sent every Monday (currently also via email).

• **Booking assignment** - A driver with an annual permit is assigned to a booking – receives the booking number and PIN. Driver must be linked to user.

• **Booking expiration** - One hour before booking expires – user is alerted it will expire soon.

• **Booking rejection** - When a container booking is rejected – the user is notified (currently also by email).

• **Container move** - A container has been moved – either loaded onto or unloaded from a truck.

• **Container ready** - When the container becomes ready for booking (status changes from red to yellow).

• **Driver gate event** - Gate entry– success or failure. Received by the organization, haulier, or driver.

• **Storage document** - Notification of vehicle storage document (for cars).

• **General notifications** - General announcements published by Port of Koper in the web application.

3 Example of received notifications:

4 The user can view received notifications in the notification list. Once the notification is read, the user can delete it manually. If not deleted, the notification will be automatically removed after 48 hours.
